

RESIDENCE

SITE:

Surat is the city of sun and is enriched with blessing of river Tapi. The riverfront in the city serves to be one of the most ambient spaces in the entire city. The site for this residence is also one such place. This site exists in almost center of the city one facade of which faces the river front and the other three faces look upto the residential area on the other sides.

STUDIO OBJECTIVE:

The residence is a place where one has to live daily. This has to be in everyway comfortable for the client, ambience vise, services vise etc. Thus to understand the space proportions, the aesthetic aspects of individual's choice its necessary to formulate our design accordingly. The client was an architect.

CONCEPT:

EXTROVERT HOUSE

An open concept - space or connection of house with the surrounding by large openings is known as extrovert house.

Extrovert house

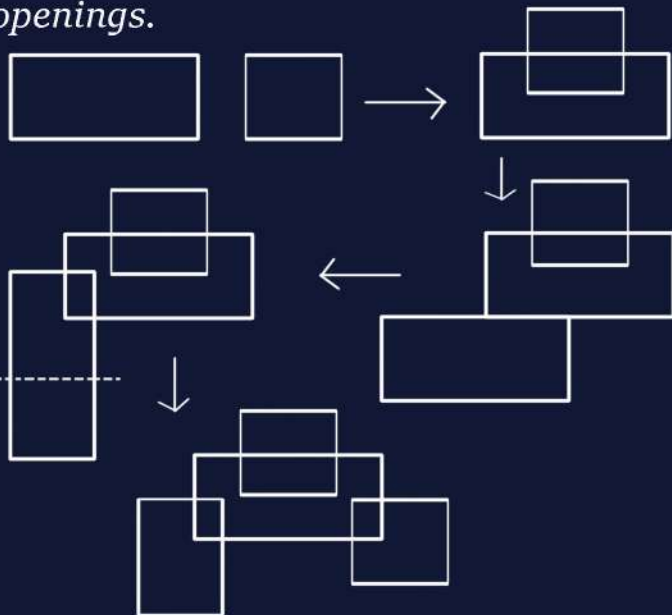

Connection with
the people around

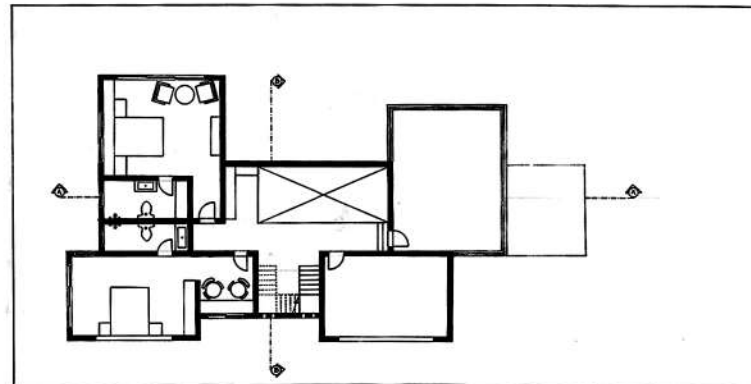

Connection with the
surrounding nature

To give an extrovert house the house is connected to nature by large openings, giving some spaces semi-covered or open to sky.

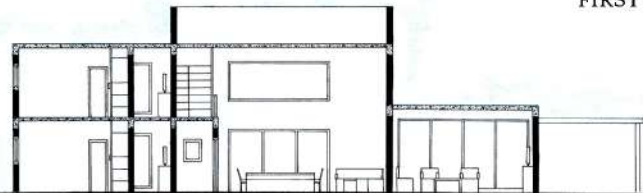

An extrovert house also means felling the outside space by sitting inside the house. In the extrovert house there is also a word solid and void which comes when elevation treatment is given as in huge openings.
